Application No.: 10/628,644

Applicant: Gregory A. Ehlers

Examiner: I. Borissov

Art Unit: 3628

Status: Pending

Independent claim 1 requires the measurement and communication of an instantaneous rate of consumption to a utility. The utility determines the capacity of the commodity that can be managed by activating an energy management program in real time. Neither the Ehlers '438 nor Peevey '459 references disclose these limitations included in claim 1. The present application is directed to demand management, while the Peevey '459 and Ehlers '438 references are systems to accumulate consumption information.
